

Security Shutters

Residential

Protect your Family and Investments with the most advanced physical barrier system from AHT.

An ultra-strong 58mm End Retention 6063-T6 aluminum alloy system will prevent the slats to be pulled away from the tracks, making a break-in virtually impossible.

AHT's Smart Integration Technology facilitates remote operation through an iPad, allowing for light and temperature control in addition to our security features.

Commercial

AHT's Commercial grade systems provide the ultimate protection utilizing a patented 60mm Double End retention mechanism, reinforced track and slats, and heavy duty motorized components. AHT's Engineering Department can provide the solutions you need, from small to large scale projects!
